

The logo for VG Instruments features the text "VG Instruments" in a bold, red, 3D-style font. The text is set against a dark blue background with a bright, glowing light source on the right, creating a lens flare effect that illuminates the scene from the right side.

VG Instruments

VG Flute Sense

NI Kontakt Sound Library, WAV

- VG Flute Sense NI KONTAKT Sound Library. Wav and .nki format.
- More than 110 unique samples without loop
- WAV files can be used directly in your DAW, or any other sampler plugin for further editing
- Set up to work with breath controllers (TEControl), wind controllers (EWI) and MIDI keyboard controllers.
- Each note was individually sampled to achieve maximum realism
- Custom designed, unique GUI
- VG Flute Sense library requires the full retail version of Kontakt 5.1 or later
- Recorded sample quality: 24 bit / 44.1 kHz
- Reverb, delay, stereo control to fit the flute in every mix
- Best Balance of Natural Velocity Resolution and Data Size
- Library Size: 291 MB

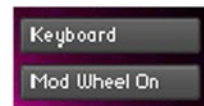

Installation Notes

1. Uncompress VGFluteSense_.zip using your favorite archiving utility.
2. Upload VG_Flute_Sense_.nki instrument into Kontakt from VGFluteSense_ folder – drag and drop, or double-click from Kontakt browser. Activation is not necessary.

Keyboard / Breath button changes performance modes:
 Playing on keyboard instrument / Playing with breath or wind controller (TEControl, EWI)

If your MIDI keyboard doesn't have Mod wheel,
 click the "Mod Wheel" button to turn it off.

Set Control Change (CC) number in MIDI CC box in accordance
 to your breath or wind controller (EWI, TEControl) settings.
 Normally breath controllers are set to send MIDI CC2, CC11
 or CC7 messages types.

Reverb ON/OFF, Delay ON/OFF and Stereo ON/OFF
 switch on/off corresponding effects.

Regulators change the level of
 corresponding effects (Reverberation and Delay)
